INDUSTRIAL DOORS & CONTROLS

Doors for All Applications

STEEL, FABRIC, RUBBER & PVC DOORS FOR LARGE OPENINGS

Advanced Systems supplies all types of industrial doors and door control systems. We are specialists in doors for tough environments.

Whether your application involves the corrosive environment of waste water treatment, the high temperatures of a steel mill or the positive and negative pressures of a wind tunnel, Advanced Systems has the right door solution! With Advanced Systems,

a large door opening does not mean you have to sacrifice options, controls or security. We can provide a door of any width by any height while considering factors such as building load, wind-load, high-speed, cycles, temperature, collision impacts, etc.

We are respected by a variety of door manufacturers for having expertise in determining the best type of door for your application.

We analyze all functional requirements and provide doors that are safe and easy to maintain.

MILLION CYCLE RELIABILITY

INDUSTRIAL DOORS FOR TOUGH ENVIRONMENTS LIKE STEEL, MINING, AUTOMOTIVE

Many companies supply doors—they apply the door they have that best fits the requirements. Our years of experience and relationships with dock and door suppliers allows us to bring a wealth of knowledge and experience to recommend the best door system for your industrial environment providing not just a door, but a solution.

Operators & Special Door Control Systems

We provide operators and special door control systems for all industries including Automotive, OEM, Steel, Mining, Fire Stations,

PLC, VFD, BUILT-IN DIAGNOSTICS

Hospital Bays, Waste Water Treatment and many more. Our Panels are built to individual specifications and use components readily available from local suppliers across North America. Our controls are universal and can be used on any type of door and are designed to meet basic industrial needs as required by door manufacturer—maintaining door warranties.

We also specialize in intelligent radio controls which can control

multiple entrance doors while providing maximum safety and security.

GUARANTEED DOOR PROTECTION

Examples of Industrial Door Applications

- For Corrosive Environments
- High Temperature Environments
- Positive/Negative Pressure Environments
- Tight Sealing
- High Wind Loads
- High Speed
- Flex-Away Bottom Panel
- 4"-6" Thick, Dual Layer Fabric
- Vertical Lift Doors
- Sliding Doors
- High Cycle Doors
- Solid Panel Doors

Control Features

- Computer, PLC or Relay Logic
- Self-Diagnostic Programming Available
- Customized for any Design Specification
- Clamp Down Enclosures & Flanged Disconnects Ideal For Abusive Environments
- Activation & Protection Devices
- Many Features Available Including Variable Frequency Drive, Uninterruptible Power Back Up & Integrated Loading Dock Control
