Maintenance Building - Mine Industry

The Megadoor on the left was installed on the exterior of the building after the door opening width and height was increased to accommodate the new larger 793 Cat haul trucks. The door on the right is one on the original steel vertical lifts doors. The new Megadoor was furnished with translucent fabric to allow as much natural sun light into the building as possible. The Megadoor was furnished with a self supporting header box and side jambs which eliminates any load on the building structure.
