### **NATION WIDE INSTALLATION & MAINTENANCE**

**Advanced Systems installs and maintains industrial doors all over North America. We specialize in working in the most demanding industries; Mining, Steel, Aero Space, Cement, Automotive, Chemical, and more. Our unique approach to meeting your installation and maintenance needs has proven to be cost effective to our existing**

#### **Problem**

- Steel Mill had large 44' wide x 18' high rolling steel doors which had proven to be costly to maintain/repair and unreliable.
- New fabric vertical lift fabric doors were proposed by Advanced Systems.
- Customer had limited skilled tradesmen and liked the immediate attention provided by their local door service company. Local door service company had limited access to offer a variety of large doors AND had no experience working with new type of doors.

#### **Solution**

- Advanced Systems offered both full installation and/or maintenance supervision. Customer hired their current local service company to install the doors with an Advanced Systems supervisor onsite instructing the tradesmen for a proper install.
- The entire operation of the door, both mechanically and electrically was thoroughly explained and demonstrated.
- Supervisor then covered maintenance procedures as recommended by the manufacturer and provided full manuals/parts information.

**Our proven methods of installation and maintenance training results in your in-house tradesmen and preferred door service company to become certified in the installation and recognized by the manufacturer.**
